# Listen to Reading

Name \_\_\_\_\_

Here are some words I can read by myself.

Handwriting practice lines consisting of a solid top line, a dashed middle line, and a solid bottom line, repeated five times.

Handwriting practice lines consisting of a solid top line, a dashed middle line, and a solid bottom line, repeated five times.

Here are two characters from the story.

A rectangular box for drawing a character, with three horizontal lines at the bottom for writing a name.

A rectangular box for drawing a character, with three horizontal lines at the bottom for writing a name.

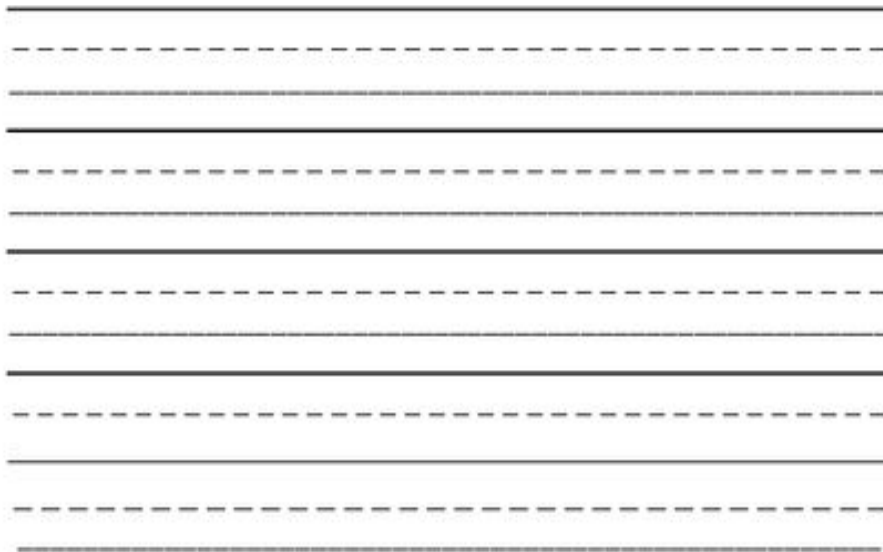

This is my favorite part.

A large rectangular box for drawing a scene or story part.

Handwriting practice lines consisting of a solid top line, a dashed middle line, and a solid bottom line, repeated five times.

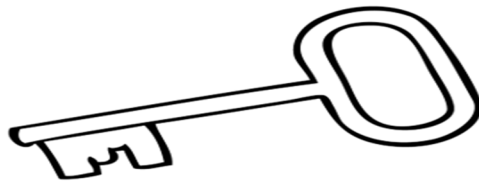

# It's The Best Day Ever

Write about the best day you have ever had at school. Give lots of details so your reader can picture the thing that happened.

Name \_\_\_\_\_ Date \_\_\_\_\_

# Think Outside the Box Thursday

I am not a Key.

I am a \_\_\_\_\_.

## Hundreds Chart Battleship

This Hundreds Chart Battleship is sure to make practicing **counting to 100** FUN for kids.

1. **Print out a 100s Chart** – Use this black and white **hundreds chart printable**. That is the basis for this Printable Battleship Math Game
2. Grab two dry erase markers and several mosaic gems. *You could play without the mosaic gems, but I thought it was helpful to have a 3D visual of our “ships.”*
3. Find an old shoe box top, file folder, or book to use as a divider to put between you and the other player.

Each player **claims a group of 2, 3, and 4 numbers** either horizontally or vertically. For instance you could mark your battleships on 22 and 23– 78, 88, 98– and 1, 2, 3, 4.

Players **take turns calling out numbers**, and the opponent either states **“hit” or “miss.”** We found it helpful to make an x over the “misses” and either checked or circled the numbers that were “hit.”

Another option is to **set the hundreds chart up as coordinates**, and calling out a number and letter marked along top and side of hundreds board {ex. B,5 = 15}. When a battleship has been destroyed, yell out, “BOOM!” The **first player to destroy all three of your opponents battleships**, wins!

But everyone is a winner as kids gain math fluency as they play this **game for grade 1 math**
